

search for ProPlus.WW\propsww2.cab, don't forget to enable the hidden/system files search. it is usually located in the cache directories ...  
\\windows\system32\cdocumentandsharing (or something like that). If that doesn't work, check if the following file is in the cache, for example:  
...\\windows\system32\drivers\ioshutdown.sys. If you see it. Then delete the file. If you see it on your computer, try to delete the user profile files (in  
C:\\Users\\%username%\\AppData\\Local\\Microsoft\\Windows\\Profile and C:\\Users\\%username%\\AppData\\Local\\Microsoft\\Windows\\Profiles\\...\\Config) if  
they are there, and reinstall Windows.
