WinBubble For Windows 10 Free

If you long for the sweet smell of the Win7 days as I do, WinBubble could be your answer. Nowadays, you can customize almost everything about your Windows, from the overall

look of your interface to the preferences and you can even change your main menu options (incl. the Explorer context menu). This is the place to load your favorite themes and skinned apps, change the welcome screen, disable the animations (cliclable on a windows edge, for example), disable picture viewer, show the fail DNS and much more. This utility has an amazing abidance of

features and there are almost no Windows or system properties that you can't customize. The 'Customize 7' section includes the following options: 1. Interface: You can choose between the standard, the Win7-style and the Win7 light themes. 2. Start menu: Choose between the old and the new icons, select the only icon to be displayed on the startup screen, and many

other tweaks. 3. Explorer: Select between various options to fix the context menu and pick a new skin, set the new options for the highlighted folders and much more. 4. Appearance and performance: You can either disable everything or turn off Desktop Compositing and turn off Internet Explorer and Windows Firewall prompts. 5. Windows shell: Choose between the Windows 7,

Vista and 2003 themes (and 2003 light one if you wish). 6. Windows startup: Choose a custom image from your hard disk (or any local file) or use the built-in favorites. 7. Crap: Select between the Crap files option, and the Show Desktop Crap option. 8. Sysinfo: You can get the system performance figures (cpu, memory and network), and the system information (harddisk, mother and others). This is truly the

ultimate tweak program, and it's also free, so there's no excuse for you not to try it. If you're looking for an extreme tweaking tool for Windows 10, WinBubble is surely a good starting point. WinBubble Features: + Load a theme or a skin + Disable animations and Windows Firewall prompts + Disable picture viewer + Open File Explorer in Full Screen + Browse for the Crap files + Change Start menu

background + Load a welcome screen + Enable Welcome Center during the boot + Enable the Crap files + Load a favorite image from the computer or from

Resize the display - Convert a window to a tile - Disable notification area - Disable the

WinBubble is a Windows Tweaker tool. You can use to control various things by yourself from the name of the window with the symbol of the flower, screen brightness, keyboard hotkey, etc. WinBubble can give you a great

convenience, easier to your PC and definitely helps you a lot. WinBubble 3.7.3 Full Version Windows 7, 8, 8.1 WinBubble only focuses on how to change the names of Windows, and this software is absolutely illegal. However, we try to minimize the inconvenience from the computer. More, we will offer you an old-fashioned best experience, so that you are not distracted by the addition of any function. For

those who worry that the function on their computers are so many, WinBubble has a special function called 'Colorfulness'. With this function, you can add new styles and place it on each folder or device in your computer. You can choose 'folder selection', 'file selection', 'group selection' or 'custom selection'. Choose a color from the tools and drag the folder or files to the group 'Theme',

then, all files and folders on the selected folder will automatically be changed to the style you chose. In order to help you track what you do to your computer, WinBubble will write "Set Items Off or On" to the Registry Editor whenever you switch between operations. We also created a convenient management of old files, so that you do not have to waste time to delete unused files. You can

also choose whether to delete the recycle bin. With these features, not only are you freed from the control of software manufacturers, you're also afraid of the real identity of programs. Let us summarize the advantages of WinBubble in a comprehensive way: 1. It provides easy access to the tools needed to control Windows by its original names. 2. You can easily choose folders or files for

the style of your choice. 3. It makes your computer more efficient by providing a new way of organization. 4. It helps you avoid being distracted by the addition of unwanted functions. 5. It makes backups that will not be disturbed by WinBubble. 6. It allows you to easily write "Set Items Off or On" to the registry. 7. You will not need to worry about the recycle bin and folders are only displayed when

needed. 8. It helps prevent the trigger by the impact of viruses. 9
